AIDAAS™ And Mobile World Launch New Online Forum To Debate Wireless

*AIDAAS™ by Allied Digital Infonet Bhd and Mobile World Team Up For **WirelessTalk.my**, an online forum dedicated to defining the future of a wireless world.*

(Kuala Lumpur 19 May, 2008) – Today, **AIDAAS™ and Mobile World** invited the delegates of WCIT 2008 to be the first participants to engage in WirelessTalk.my. The new online forum offers a community space where visitors can post questions, comments and videos, and discuss the latest developments in wireless technology. Topics can range from regulatory matters, safety issues, and consumer preferences to deployment and application issues.

WirelessTalk.my is designed to address all these needs and more. With its global outlook and reach, the forum aims to become a recognized source of reference for emerging market trends, competitive reviews, and market forecasts. Besides technical, regulatory or commercial aspects of wireless technology, the forum emphasizes the role of ICT for development.

‘The digital divide between urban and rural areas is still wide. I believe wireless provision of internet access, can make an important contribution to bridging this digital divide. By addressing challenges facing the industry, WirelessTalk.my aspires to provide insights to help define the future of a wireless world with access for all’ said Aida Dato’ Seri Mohd Adib, Director, Allied Digital Infonet Berhad, the company behind AIDAAS™ .

‘Our hope for WirelessTalk.my is to provide a space for consumers as well as industry professionals to share knowledge on new and emerging wireless technologies. The diversity of participants, from end-users to vendors and service providers is likely to generate lively discussions’ added Aida.

‘The Mobile World team will play an active role in the online discussions with news, articles and comments on developments in the wireless industry. I hope that by expressing different opinions and sharing knowledge, we can play a positive role in the growth of global wireless technology’ added Kashminder Singh, Editor of Mobile World. About AIDAAS™

AIDAAS™ is an innovative wireless broadband delivery system that completes existing access technologies – offering a broader range of applications, with wider reach, capacity and speed.

AIDAAS™ was developed by Allied Digital Infonet Berhad together with its Ukrainian partners. Based in Malaysia and incorporated in 2005, Allied Digital Infonet Berhad (718859-T) is an innovative wireless solutions provider of the proprietary and patented AIDAAS™ technology. Allied Digital Infonet Berhad manufactures the complete AIDAAS™ system from the central station to the CPE.

AIDAAS™ is a DVB-S (digital video broadcast-satellite) technology that provides a single platform for broadcast and broadband multimedia services.

The technology comprises of the Central Station and the Customer Premise Equipments (CPE), which includes the set-up box and antenna. The central station has the ability to transmit data within a radius of 40km and up to speeds to 30Mbps from the central station, returning data from the customer premise at 2.5Mbps. The central station has a capacity to transmit up to 800Mbps.

AIDAAS™ vision is to 'Reinvent Institutions' by promoting intellectual development through last mile connectivity which gives access to knowledge and information to underserved communities and supports home grown research and development.

About Mobile World

MOBILE WORLD is this region's leading mobile lifestyle and technology magazine. Tech savvy people read Mobile World to keep abreast of latest gadgets and mobile technologies. The magazine is also keenly followed by executives from the telecommunications and IT industries.

MOBILE WORLD, launched in 2002, is currently distributed throughout Malaysia and Singapore. A companion website which seeks to inform, engage and involve a worldwide audience is located at www.mobileworld.com.my.

In 2006, One World Solutions, the publishers of Mobile World launched Surf! magazine which is focused on the Malaysian Internet lifestyle and technology companies.
